

IT Support and Consulting

The Banking Industry is faced with a unique set of challenges in an ever changing business environment. There are many factors to contend with, including regulatory compliances, operational risk, and cost effectiveness. The professionals at ITBX are here to insure your IT Infrastructures are built, managed, optimized and secured to meet the Banking Industry's specific standards.

With 100 percent secured consulting and support services, we provide around the clock access to address all of our clients' needs. After implementation of your infrastructure, we collect and resolve any compatibility issues. We provide onsite training to all of our clients on applications to improve functionality.

System configuration, alerts, workflow and escalation procedures are also provided to our clients. Our consulting professionals have extensive industry knowledge and experience within all aspects of IT infrastructures within bank branches and the industry as a whole.

We are here to handle any questions that might arise and are ready to walk you through proper IT solutions 24 hours a day, 7 days a week. From implementation, to system updates and service, no question is too big or too small for our team.

Whether you are a new ITBX customer, or you are an existing member of our family, contact us today for all of your IT support and consulting needs.
